

Chienkan High School

Cultivate: Cultivate your mind.

Create: Create your own self.

Challenge: Challenge your limits.

-- School Motto

CHS is located within the Saga District Dome 15 of Kaguya, the part formally corresponding to the Saga Prefecture. It is one of Lunar Nippon's "Super Science Highschools", having a very strong focus on science (especially biology).

CHS is well renowned academically. It gives excellent chances of entering a good university. It also has a somewhat international character, with numerous exchange students or students with mixed background.

Professor Hazuki from the Tokyo University Educational Research program is leading the school's teambuilding, underconstrained problem solving exercises. These exercises aim at giving the students useful flexibility and synergy skills. This is seen by some as too internationalist in the outlook, so the school often plays up many traditional Japanese educational methods too.

Sports is another area where CHS is doing fairly well. Chienkan Tigers rugby team under Coach Shinji Tenzaburo is having great hope for this season.
