

## **Terrorist Attack on Pentapod Delegation**

A terrorist attack on the Fromme Spaceport on Kimanjano Wednesday November 5 2313 killed the members of a pentapod delegation and 10 humans. The attack on the peaceful envoys is the most serious inter-species incident between humans and pentapods ever, and may affect trade across the French Arm.

In a statement, General-Governor Duchenne said, "The attack was cruel and reckless, endangering hundreds of innocents and focusing on the defenceless alien diplomats. It clearly shows the levels of depravity the so-called resistance terrorists have sunk to. Fortunately French troops were on the scene and managed to reduce the damage. They killed or immobilized several of the terrorists and drove off their main contingent before they could cause a worse disaster. I promise you all, human or pentapod, that we will not rest until we have apprehended all those responsible and brought them to justice for this atrocity!"

According to witnesses the terrorists emerged from a cargo space at the airport, using guided missiles and snipers to hit the delegation. Although identification remains uncertain, it is assumed that the terrorists were members of the secessionist movement seeking colonial independence from the French Empire.

The pentapods have not issued any statement yet.
